Re: Telecom Fiji/Connect Internet service

Telecom Fiji/Connect clients are currently facing Internet service disruptions. The finger is being pointed at FINTEL.

FINTEL would like to assure the public that the Internet service disruption is only isolated to TFL/Connect clients.

All other FINTEL valued Internet Service Providers (ISPs), Vodafone, Digicel, Unwired, Kidanet and Corporate clients interconnecting direct with FINTEL are not affected.

FINTEL's IP Transit (Internet) service is built with the following redundancy and resilience – protected cable capacity, dual peering in USA and Australia, redundant international back haul and dual peering partners.

The issue with disruptions to Connect Internet service is between Telecom Fiji and its only proposed Australian partner.

Thanks

George Samisoni
